Profile

I am a recent Computer Science graduate from the University of St Andrews now working as a Software Engineer at NCR Atleos, with a strong interest in web and video game design and development. Throughout my degree, internship and participation in hackathons, I have gained substantial experience in programming and collaborative work, developing strong problem-solving, communication and interpersonal skills which I continue to develop in my professional role.

Work Experience

Software Engineer

NCR Atleos, Dundee

June 2025 - Present

Software Engineer Intern

NCR Atleos, Dundee

May 2024 - August 2024

- Developed a customer-facing web application in a team of two, using React for the frontend and testing code using Jest with 100% code coverage.
 - Managed the project using Agile methodologies, including a Kanban board to track our user stories, and attending daily standup meetings and weekly demos to monitor our progress.
-

Education

University of St Andrews - BSc (Hons) Computer Science *Upper Second-Class*

September 2021 - July 2025

Relevant Modules: Major Software Project, Software Engineering Team Project, Video Games, Constraint Programming, Computer Graphics, Artificial Intelligence, Data Communications and Networks, Data Encoding, The Internet and the Web.

Awards: Placed on the Deans' List in my first and fourth years for academic excellence.

Key Skills Developed:

- Designed and developed an optimal solver for a specific Rubik's Cube variant as part of my Senior Honours project.
- Led a team of 5 people as the Scrum Master and collaborated in a supergroup of 20+ people using a Scrum framework to develop a WikiData visualization tool using React, Vega, and other languages/libraries.
- Wrote detailed reports on my assignments, containing design decisions, implementation notes and code evaluations.

Earlston High School

August 2015 - June 2021

Advanced Highers: AA in Mathematics and Physics

Highers: AAAAAA in Mathematics, Physics, Engineering Science, Chemistry and German; Pass in NPA Software Development

Skills & Other Programming Experience

Programming Languages & Libraries: Java, JavaScript, React, Jest, HTML & CSS, Python, C#, C, Bash, SQL.

Other Technical Skills: Version control using Git/GitLab/GitHub; Agile/Scrum project management methodologies; Experience with the Unix terminal; Game development with Unity; Experience in using Microsoft Office programs.

Programming Experience:

- Came first in BlackRock's challenge at the 2024 Dundee University Hackathon, with a financial toolkit web application that I helped develop in a team of 4 people using EJS, Tailwind CSS and Express.
- Competed in the 2025 Dundee University Hackathon, with a web-app designed to promote car-pooling to nearby events. Developed in a team of 4 using EJS, Tailwind CSS, Express, MongoDB, and the Google Maps API.
